

### CERAMIC AIR HEATERS

10/32 Screw Terminals with 3/8" Diameter Center Hole, 1.875" OD x 7 1/4" Long

Part Number	Watts	Volts
CAH-0001	3000	240
CAH-0003	2000	240
CAH-0005	3500	240
CAH-0007	2500	240
CAH-0009	2000	120
CAH-0011	2500	208
CAH-0013	1500	240

### CUSTOM CERAMIC INFRARED HEATING SYSTEM

**ITS** offers special custom designed and engineered Process Heating Systems. This heating system has two separate heating zones: one zone is for the radiant heating section and the other zone is for the heated base or hot-plate. This heating system preheats tubes on the sides and on one end so that the tube can be welded much faster with less rejects. This Radiant Heating System uses Microprocessor Based Digital Temperature Controls with Auto-Tuning. For temperature controls go to our temperature controls section in the front of our catalog. We also offer quality SSR's and SCR's for immediate shipment.
